

Flow document for KYC default configuration

We have set the below listed variable as a default configuration. All variables are configurable from crm.

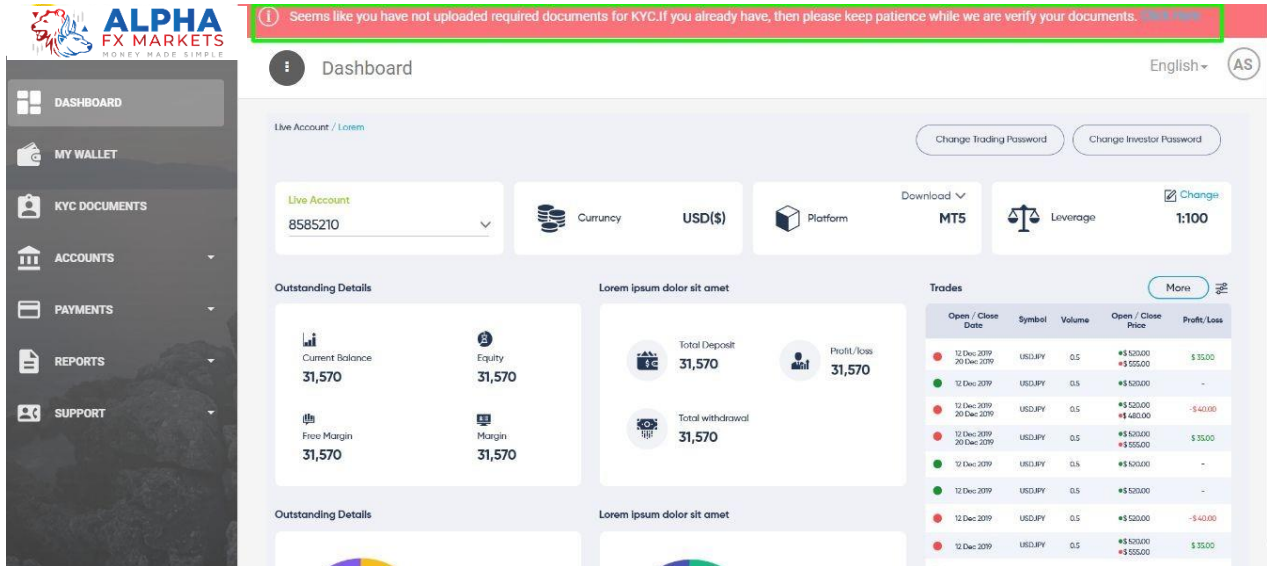

- 1) Demo Account Module ->Enable
- 2) Live Account Module -> Disable
- 3) Deposit Module -> Disable
- 4) Withdrawal Module -> Disable
- 5) Transfer Module -> Disable
- 6) IB Account Module ->Enable

Login into application for the First time

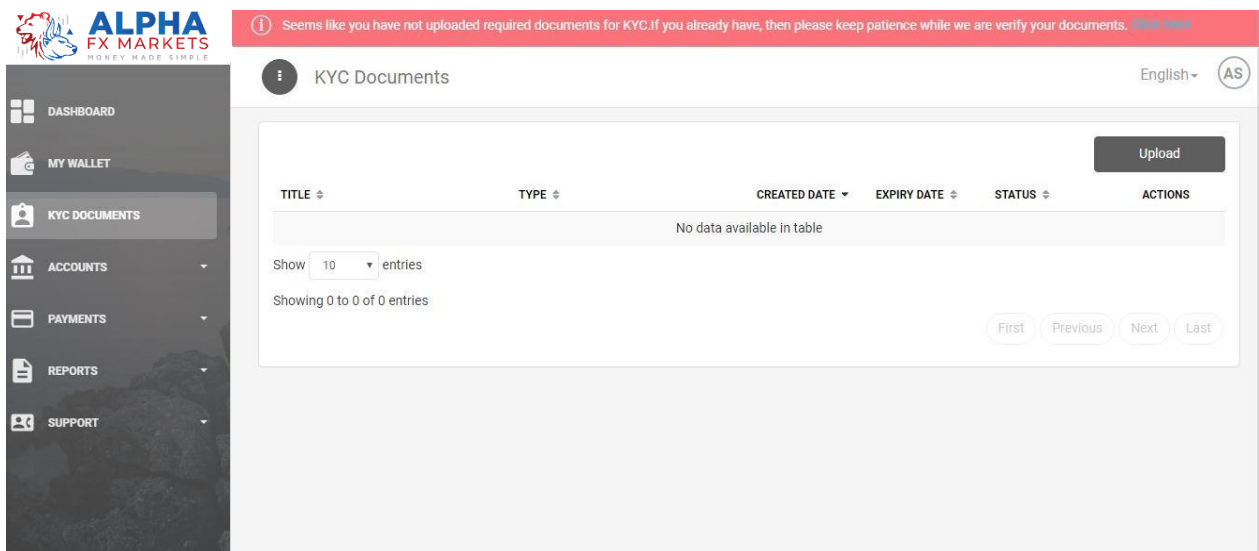

Step 1) If the user logs into the application for the first time then “Set Preference” pop up appears.

Step 2) After setting the preference the user is redirecting to ‘Dashboard’ where the message is displayed in the header.

Step 3) On click of the ‘Click Here’ the user is redirecting to KYC Document Module.

KYC Documents

- The KYC Document module will have the ‘**Upload**’ button , on click of which the user can upload his document
 - Ex: ID proof and Residence proof.
- The pending record is created in the list after successfully uploading the document.

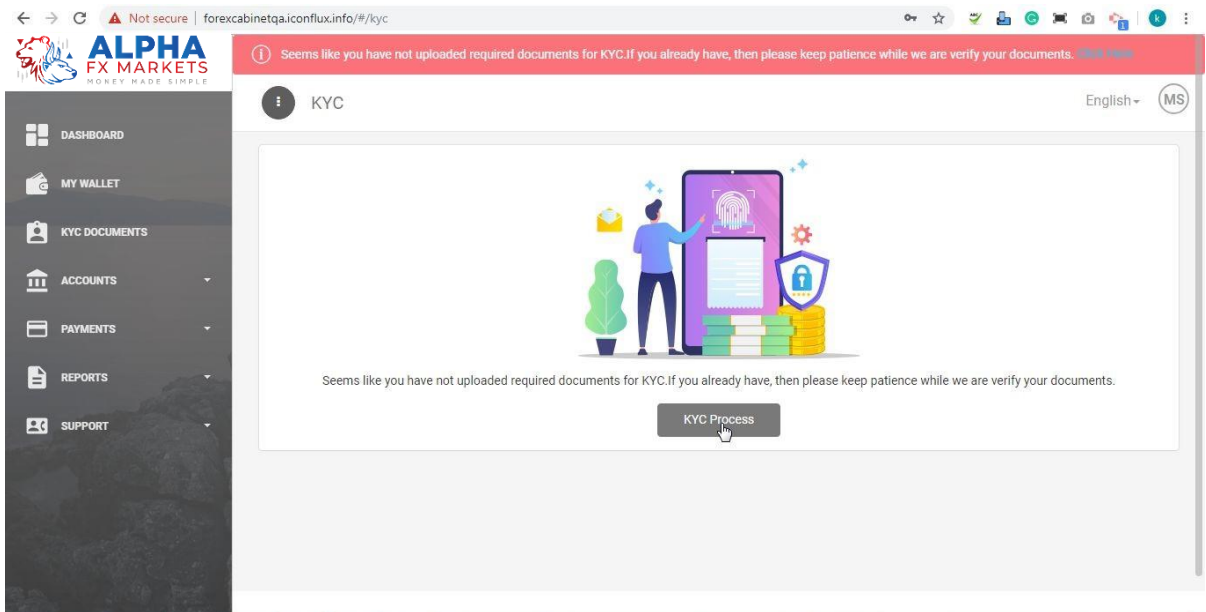

The following module is enabled if the KYC is not Verified

1. Dashboard
2. My Wallet

3. Demo Account
4. IB Account
5. Leverage history
6. My Transaction
7. Ticket
8. FAQ

Rest of the module will display with below image for KYC not verified

1. Live Account
2. Deposit
3. Withdrawal
4. Transfer

- On clicking the 'KYC Process' button it will redirect to the KYC Document Module.
